

An integral ingredient in the Restoring Cellular Communication Programme™

Flora Syntropy

Right spinning probiotic; Milk Free, Allergy Free
180 Veggie Capsules

Matrix Nutritional Series

Right Spinning Probiotic

Matrix Nutritionals Series was designed as an eclectic offering for the Physica Energetics line of remedies primarily to assist in the “reactivation of the mesenchyme” (Dr. Reinhold Voll), via the nutritional complement pathways. These pathways are present in every system throughout the body and require balanced attention. In keeping with the principles of BioEnergetic Medicine, the remedies nourish and support these systems without punishing them with overstimulation or imbalancing factors, which, ultimately, is counterproductive. This approach has been carefully and respectfully designed to provide the necessary natural (organic where available), synergistic factors in proper energetic and biochemical ratios, to ensure assistance towards yielding a deep and lasting result. They are not to be confused with replacement therapy nutraceuticals that may seem to help for the moment, until the patient stops taking them or the condition is driven deeper. These remedies honour The Legacy of BioEnergetic Medicine, and are known by both patient and practitioner to be exceptionally effective.

Patient Reference

“Where health and vitality are found, friendly and beneficial microbes invariably exist. Likewise, where decay and dysfunction are found, the microorganisms associated with disease are present”

Dr. Bernard Jensen

“Friendly” and beneficial bacteria play a variety of crucial roles in the body. In addition to aiding digestion and elimination, bacteria in the intestinal tract are important for the absorption of certain nutrients, production of B vitamins and vitamin K, controlling yeast and bacterial overgrowth and assisting in the immune response.

***Lactobacillus sporogenes*, also known as *Bacillus coagulans* (strain ATCC 7050),** is a spore-forming, non-pathogenic bacteria naturally found in the human gastrointestinal and vaginal tract.

***L. sporogenes* is resistant to heat, acid, bile, and antibiotics.** The spores are able to pass through the acidic environment of the stomach and enter the small intestine unharmed. Once there, the bacteria proliferate rapidly, colonizing the small intestine. It is estimated that germination of *L. sporogenes* takes place four hours after ingestion.

The lactic acid and bacteriocidins produced by *L. sporogenes* serve to increase the population of beneficial bacteria, while making the environment inhospitable for infectious or pathogenic organisms. Since *L. sporogenes* produce only L (+) lactic acid, it does not cause metabolic acidosis.

The ability to bypass stomach acid and bile, as well as a rapid rate of colonization and proliferation make *L. sporogenes* more effective at controlling infectious

organisms in the intestines than other probiotic strains.

In the treatment of dysbiosis, *L. sporogenes* was found to be 20-30% more effective than *Lactobacillus acidophilus* or *Bifidobacteria*.

Inserted vaginally, *L. sporogenes* is useful in the treatment of vaginal infections and vaginitis.

***L. sporogenes* is able to bind cholesterol in the gut,** removing it from the body. Clinical studies found that supplementation with *L. sporogenes* decreased total serum cholesterol levels, with a slight increase in HDL levels.

***Flora Syntropy* is a right spinning probiotic that is completely milk and allergy free.**

***Flora Syntropy* contains active probiotic cultures of *Lactobacillus sporogenes*,** with 50 mm CFU concentrated from 15 billion live organisms/gram, making this the highest concentration of bacteria available in the world (other companies may list higher CFUs but that is an inaccuracy designed to gain a false marketing advantage).

Fructooligosaccharides provide food for the bacteria, allowing them to multiply more rapidly once they reach the gastrointestinal tract.

***Flora Syntropy* re-establishes a healthy intestinal terrain, maintains appropriate bowel transit time and offers assistance in cases of gastrointestinal distress. It is a wonderful addition to any healing strategy, especially constipation/diarrhea, dysbiosis/IBS, infection, or during and following antibiotic treatment.**

Ingredients (per 2 capsules):

Lactobacillus sporogenes 50 mm CFU (concentrated from 15 billion live organisms/gram)
Fructooligosaccharides 250 mg
