Influenza Immune Drainage & Tonification

Drainage and Tonification is central to the healing process. It is well understood that until the extra cellular matrix is clarified, there will not be complete cellular resolution. 1) BioToxicosis remedies such Lymph 1, 2, and 3 assist in the clarification of the systemic drainage pathways 2) Spagyric botanicals decongest, drain and detoxify at the physical level and 3) the Milieu Series provide homeopathic drainage at the point of focal interference. Utilizing this combination, the local and systemic ECM drainage pathways are liberated and healing is the natural outcome as obstacles to cure are no longer an issue. *As an added bonus feature, the Milieu Drainage Tonifiers also contain specific flower remedies designed to assist in the drainage and tonification of the emotional terrain.*

Homeopathic drainage is considered to be a functional process, traditionally accomplished using low potentized remedies. Today, the increasing xenobiotic onslaught upon our world requires a more extended approach.

The Milieu Series of remedies was eclectically and thoughtfully crafted to provide a more global understanding of a case picture. The addition of complementary tonification factors assist in preparing the body for deeper, safe detoxification.

Each remedy provides gentle drainage and tonification, without causing the immediate release of cellular toxins, which can create additional complications for BioToxicosis and Homotoxicological processes.

A blend of low potentized, ascending homeopathic glands and hormones combine elegantly with Spagyric botanicals, polychrests, cell salts and flower essences to complete the case picture and ensure a well measured and proportionate response.

Western-approach clinicians report successful integration of the Milieu drainage and tonification remedies in acute situations related to the organ or causal chain indicated. TCM practitioners find that drainage remedies nourish the blood, chi, yin and yang. Similar results are reported in healing arts' approaches around the world, although with different "poetry", including Ayurveda, South American traditional medicine, etc.

These unique remedies work exceptionally well in opening up conditions that are stuck or potentially cloaked.

Concerned virologists have been expecting the appearance of a virulent Influenza strain that may well rival the great 1918-1919 Spanish Flu epidemic, which swept the globe in only a matter of months and left between 5 to 50 million people dead in one of the most horrific medical crises to ever strike the earth.

Since that dreadful pandemic, scientists at the Center for Disease Control, in cooperation with the World Health Organization and the Defence Department, have been carefully monitoring both SARS and influenza viruses in anticipation of mutated disease strains, which would be capable of causing a world-wide epidemic equal to, or worse-than, the infamous 1918 Spanish Flu.

The Centre for Disease Control and Prevention (CDC) estimates that each year, 35 to 50 million Americans come down with the flu between November and March. Children are two to three times more likely than adults to get sick and spread the flu virus to others and the elderly are particularly vulnerable to the effects of colds and flu. Therefore, chances are significantly high that someone in most households will catch a cold or the flu this winter.

It is not a matter of pumping or boosting the immune system, it is a matter of regulation and modulation. Boosting the immune system always comes at a cost, as practitioners of homotoxicology well know!

Adrenal insufficiency must be addressed for colds and flu that continue more than 7 days, or take a long time to completely disappear or return again within a short time.

Flu Milieu was designed to provide metabolic leverage and resiliency to support the immune system during colds and flu. Physica Energetics' unique processing allows the remedy to be custom imprinted, adding to the power of the Milieu, eg. Bryonia 200C.

Drainage without tonification will prove ineffective, as cells and organs may well buckle under the strain of detoxification. The patient may feel better initially, however, in the long run, the damage will be apparent often in the form of other conditions.
